OEFFA Conference

CFAES

THE OHIO STATE UNIVERSITY

COLLEGE OF FOOD, AGRICULTURAL,
AND ENVIRONMENTAL SCIENCES

Project Overview

- Evaluate the strengths and weaknesses of Ohio Farmers Markets work in data collection
- Train managers and extension educators on the suite of available tools and appropriate methodologies
- Create a culture of shared data collection and use to increase farmers markets sustainability and success.

Project Overview

Oct. 1, 2020 – Sept. 30, 2022

PI – Eric Barrett

Co-PI – Christie Welch

Funder North Central SARE

Collaborators – Farmers Market Coalition

<https://farmersmarketcoalition.org/>

Ohio Farmers Market Network

<https://ohiofarmersmarketnetwork.org/>

Project Activities to Date

- Created a database of Ohio farmers markets and if/how they collect data
- Visited farmers markets throughout Ohio to learn how they collect data
- Provided training to OSU Extension Educators on tools to assist farmers markets with data collection

Project Activities – In Process

1. Create a database of the data-collection projects among Ohio markets and vendors
2. A "train the trainer" training on market data collection needs and processes
3. Conduct case studies of Ohio direct marketers that sell at one or more Ohio farmers markets to learn how they use data for business decision making.

Data Collection Comfort Among US Farmers Markets

In most cases, the comfort level for building a sustained data collection culture at a farmers market falls into one of four clusters:

| Data collection comfort and use. Those organizations that: | Estimated percentage of market organizations in U.S. (by FMC and state and network leaders) | Current strategy used by FMC and its partners to assist the market operators |
|--|---|--|
| Group 1: Collect data methodically and use it regularly for external social media, for funders, or for annual reports to their community. | Estimated to be about 10% of U.S. market operators. | Sharing the pros and cons of all software and data management systems currently in use across U.S. Metrics software subscriptions and other infographic support, National Farmers Market Week Toolkit, amplification of reports via FMC social media. |
| Group 2: Collect data sporadically and usually only on request by their funders, rarely using it for their own communications or for internal analysis. | Estimated to be about 25% of the U.S. organizations. | Work with funders to ease/better understand data collection requirements, offer collection templates and refined metrics list. Share case studies of Group 1 graphics and uses. Sharing the pros and cons of all software and data management systems currently in use across U.S. Support from partners in collecting data is very helpful. |
| Group 3: Collect data regularly but use only for internal analysis and decision-making. This group does not use data management software or systems, often managing the data in an informal way. Usually very resistant to any input from network leaders in changing their system. | Estimated to be roughly half or about 45% of U.S. organizations. | Offer data collection templates, refined metrics list, and strategies for more analysis. Support their ability to make analysis more useable to their market community. Webinars and templates focused on how and why to become a more proactive data-driven market. |
| Group 4: Almost no data collection comfort. Even though this group does have it, it doesn't see it as "data." Sees no need to publish it to their stakeholders, or assumes a data collection process will be too difficult for their market(s) to adopt. | Estimated to be about 20% of the market operators. | Webinars and templates focused on how and why to become a more proactive data-driven market. Seek out their data-driven vendors (often certified organic or multi-channel businesses) that would welcome data from these markets to assist their own business planning. General market-level capacity building support also needed. |

Culture of Data Collection at Markets

Markets are Great at Story + Data...

WFM @WilliamsburgFM · Jun 26

Wonder how many acres it takes to bring the market to life each Saturday?

#keepingfarmersfarming #tuesdaytweets #KnowledgelsPower

Williamsburg Farmers Market

3,075 acres

of diversified farmland in production by vendors.

America loses an acre of farmland every hour to development.

farmersmarketcoalition.org

Hampton Blvd Farmers Market

May 28 · 4

Keeping it LOCAL and FRESH! That's what we're all about! Come see us Wednesdays 3-7 pm at the Church of the Good Shepherd, 7400 Hampton Blvd in Norfolk.

Hampton Blvd Farmers Market

21 miles

average distance food travels from farms and kitchens to our market

That's fresh! Most food eaten in the U.S. has travelled nearly 1,200 miles.

4 Shares

Hampton Blvd Farmers Market

August 9 · 4

We have updated stats based on our current vendor lineup. Check this out! #farmersmarketweek We do have vendors from Suffolk, Surry County and even Williamsburg, but this is the average.

Hampton Blvd Farmers Market

11 miles

average distance food travels from farms and kitchens to our market

That's fresh! Most food eaten in the U.S. has travelled nearly 1,200 miles.

we'll come back to this later on...

Farmers Market Metrics

Metrics Table

This table presents twelve of the metrics used in the Farmers Market Coalition's **Farmers Market Metrics Training**, with recommended data collection methods, instruments, and frequency noted. To further highlight the range of benefits that markets bring to their communities, metrics are categorized by the type of benefit, or *capital* that each represents.

Economic Capital

identifies financial rewards, including job creation and built infrastructure

Social Capital

facilitating social inclusion, bridging and bonding, and civic engagement

Human Capital

acquiring knowledge, skills, habits and capacity to make healthy choices

Ecological Capital

restoration, conservation or stewardship of natural resources

| Metric | Collection Method | Collection Instrument | Collection Frequency | Capital | Reporting Context |
|---|-------------------|-----------------------|----------------------|---|--|
|  Average distance in miles traveled from farm to market | Document Review | Vendor Application | Once per season |   | {X} miles is the average distance food travels from farm to our market. That's fresh! Most food eaten in the U.S. has traveled nearly 2,500 miles. |

Data Collection at Ohio Markets

OHIO MARKETS FOLLOW NATIONAL TREND

What information do Ohio markets collect?

- Customer counts
- Customer zip codes
- Vendor sales

What methods do Ohio markets use most often?

- Rapid Market Assessments
- Anonymous surveys
- Tally counter

Data Collection at Ohio Markets

WE WANT MORE DATA

BUT HOW DO WE GET THERE?

Data Collection at Ohio Markets

OHIO MARKETS FOLLOW NATIONAL TREND

What information do Ohio markets collect?

- Customer counts
- Customer zip codes
- Vendor sales
- Vendor zip codes
- Farm acreage
- Number of women or BIPOC owned businesses
- Number of different products sold
- Ratio of product types
- Distance traveled by vendors
- Total number of tokens sold
- Total number of SNAP dollars sold, used, reserved
- Number of social media followers
- Number of click throughs on newsletter

What methods do Ohio markets use most often?

- Rapid Market Assessments
- Anonymous surveys
- Tally counter
- Point of sales systems
- Market application
- Social media statistics
- Newsletter statistics

~~WE WANT MORE DATA~~

BUT HOW DO WE GET THERE?

Data Collection at Ohio Markets

2018

Farmers Market Promotion Program (FMPP)
grant focused on Central Ohio farmers
markets in partnership with
City of Columbus and Franklin County Local
Food Action Plan.

2014

Host Darlene Wolnik at Ohio Farmers
Market Conference to lead market
managers on an exploration of data.

2021

Regional Food Systems grant
partner to Green Umbrella in
Cincinnati region.

Data Collection at Ohio Markets

INCREASE DATA COLLECTION

- OFMN led projects and grants with data focus
- Get more markets collecting more data
- Work with national partners like FMC

The image displays three hand-drawn survey forms, likely created on a chalkboard or similar surface, used for data collection at Ohio Markets. Each form is divided into sections for different types of data collection.

Form 1: HOW DO YOU GET INFORMED ABOUT THE INDOOR FARMER'S MARKET?

| GREEN SIGN | MARKET WEBSITE | FACEBOOK TWITTER | VENDOR SIGNS | WORD OF MOUTH |
|------------|----------------|------------------|--------------|---------------|
| ○○○ | ○○○○○ | ○○○○○ | ○○○○○ | ○○○○○ |

Form 2: DO YOU VISIT OTHER STORES IN THE MALL WHILE AT THE INDOOR FARMER'S MARKET?

| YES | NO |
|-------|-------|
| ○○○○○ | ○○○○○ |

Form 3: HOW OFTEN DO YOU SHOP AT THE INDOOR FARMER'S MARKET?

| EVERY WEEK | 2-3X A MONTH | ONCE A MONTH | RARELY | FIRST VISIT |
|------------|--------------|--------------|--------|-------------|
| ○○○○○ | ○○○○○ | ○○○○○ | ○○○○○ | ○○○○○ |

The OFMN logo (Ohio Farmers Market Network) is visible in the bottom right corner of the third form.

Data Collection at Ohio Markets

RAPID MARKET ASSESSMENTS

Also known as "dot surveys" or RMAs.
Completed 25 in 2019, 21 in 2021.

IN-DEPTH CONSUMER STUDIES

Completed 4 studies - Canal Winchester, Clintonville, Franklin Park Conservatory and Botanical Gardens, and Hilliard in 2019.

VENDOR INTERVIEWS

Interviewed more than 50 stakeholders.

Data Collection at Ohio Markets

AVERAGE \$ PER SHOPPING GROUP

2019 - \$21.44

2021 - \$28.29

AVERAGE ATTENDANCE

2019 - 973

2021 - 750

AVERAGE PRODUCER SALES

2019 - \$375.96

2021 - \$403.76

Data Collection at Ohio Markets

IS YOUR MARKET SHARING DATA?

Does your farmers market manager
share the data collected with you?

ARE YOU COLLECTING DATA?

Your farm or food business
can do a lot with data!

WHAT DATA WOULD BE HELPFUL?

What data can farmers markets collect and
share that would be helpful to vendors?

**DATA IS FOR
EVERYONE**

Project Activities – In Process

Conduct case studies of Ohio direct marketers that sell at one or more Ohio farmers markets to learn how they use data for business decision making.

We would appreciate your input.

Project Activities – In Process

1. How do direct marketers that participate in one or more Ohio farmers markets use data to make business decisions?
2. How do the direct marketers collect and analyze this data?
3. What data does the farmers market collect? How is this data shared with the direct marketer?
4. What data collected by the farmers market would be helpful for the direct marketer to improve their business?

Project Activities - In Process

If you would like to be a case study participant?

Email Christie Welch

welch.183@osu.edu

How can you be involved?

- Volunteer to participate in a case study.
- Share information about farmers markets in your county/community
- Attend the train-the-trainer session on available tools to assist with data collection
- Connect with the OSUE Direct Food & Ag. Marketing Team, Farmers Market Coalition, and the Ohio Farmers Market Network

OSU Extension Direct Food and Agricultural Marketing Program
